

DID YOU KNOW?

GERM-KILLING DISINFECTANTS CAN BE SAFE!

PREvail[®] VS BLEACH

Safer

- Its gentle formulation is non-toxic and non-irritating when use as directed
- Safer for animals and staff
- No harsh chemical odour
- The only Fear Free[®] disinfectant

Faster

- Needs only a 1-5 minute contact time to kill the toughest pathogens, including parvovirus
- Less waiting between patients

Cleaner

- ONE solution for both cleaning and disinfecting
- Built-in detergents resulting into ONE easy step

Sustainable

- Accelerated Hydrogen Peroxide[®] (AHP[®]), is the active ingredient in Prevail[™]. Hydrogen peroxide breaks down into water and oxygen without leaving any harmful residues behind

Make the change today.

✗ NOT Safe

- Bleach is harsh, threatening the safety of animals and staff
- Can cause serious skin and eye irritation and respiratory illness, including occupational asthma¹
- Harsh chemical odour may cause stress in animals and irritation to staff

✗ NOT Fast

- Takes up to 10 minutes to kill pathogens
- Not ideal or realistic for fast paced environments

✗ NOT a Cleaner

- Inactivated by soil contact and therefore an additional product is required for cleaning

✗ NOT Sustainable

- Chlorine, the active ingredient in bleach, can react with other chemicals and create by-products that are harmful to the environment

NOT an option.

Choose Prevail[™] - the right disinfectant for better animal health.
